

Director of Athletics

Dear Mark,

On behalf of the De La Salle football program Bob and I wanted to write a letter informing Sportexe of how satisfied we are with our new Momentum turf. We have been playing and practicing on the turf for three months and our players love the surface. The field is fast yet soft enough that the players feel better the day after a game than they did from our old grass field. As you know, we have some of the fastest football players in the state, and this field has done nothing but enhance their performance. Interestingly enough, we have played twice on sand/rubber fields sold by a popular company and each time our players agreed that they liked our field better; some players felt the other fields were just "too hard." Additionally, we have heard nothing but compliments from our Soccer, Lacrosse, and Rugby coaches and players. Purchasing your turf and working with your professional staff was one of the best decisions that I have made in my nine years as Athletic Director of De La Salle. Not only did our school receive a fantastic surface, but the money we saved by choosing Sportexe was icing on the cake. Our only hope is that more schools and coaches realize that if they are in the market to purchase an artificial field they need to look no further than Sportexe. We wish you great success in the future.

Bob Ladouceur Head Football Coach

Terry Eidson Athletic Director
